

Water Committee Meeting

May 4, 2016

Members Present: John Raymond

Public Present: Tim McKay, Harold Andrus, Ben Lubber, Dennis Lubber, and Chris Shepard

Topics Discussed:

Water tower has been cleaned and inspected, and the new mud valve has been installed.

No new information regarding the status of our reliability study was available.

A **Water Quality Survey** draft was reviewed by the members and the public that were present. If approval by the village council is needed and can be received, it is proposed that the survey could be sent along with the water billings.

We also discussed shut-off and turn-on fees for water service. As a result of the discussion, Article 6.13 states, that water bills are to be delivered on or before the first of the month, are to be paid by the 20th of the month, and has a 10 day grace period before any late charges (10% of the total) are to be added to the bills.

Need to clarify information about hydrant rental costs that are on the monthly reports.

The results of water sample LG39175 were reviewed and showed a “not detected” for *Coliform Organisms*.

Meeting was adjourned at 7:10 PM
