

Water Committee Minutes

May 02, 2018

Called to order: 6:30pm

Present: John Raymond, Chris Shepard, Russ Yarger

Received water samples LH73408, and LH77751 both with a “not-detected” result for coliform organisms.

State mandated PFAS Test Sample was sent on 4/29/2018. Results will be with next month’s samples.

Discussed a 3-year project to identify all remaining lead fittings that could remain in our water supply system. We plan to replace any lead parts as they are discovered.

Discussed the amount of pay Russ receives as our water operator and his desire to increase that amount. Also looking into finding a back-up water operator and/or the costs of appointing a new operator versus paying an outside third-party contractor to oversee the water program.

Water hydrants will be flushed on May 14, 2018 immediately following the village council meeting.

Adjourned at 7:00pm
